

RETATRUTIDE

ADVANCED PEPTIDE RESEARCH FORMULA

WHAT IS RETATRUTIDE?

Retatrutide is a next-generation multi-receptor peptide that targets GLP-1, GIP, and Glucagon receptors to support comprehensive metabolic health and weight management.

KEY BENEFITS

-  **SUPPORTS WEIGHT MANAGEMENT**
Helps reduce body weight and body fat effectively.
-  **APPETITE & CRAVING CONTROL**
Promotes satiety and helps reduce hunger and food cravings.
-  **IMPROVES METABOLIC HEALTH**
Supports healthy blood sugar levels and insulin sensitivity.
-  **ENHANCES ENERGY & WELL-BEING**
Supports overall vitality, energy levels, and mood balance.

RELATED INFORMATION

-  **Multi-Receptor Agonist**
Targets GLP-1, GIP, and Glucagon receptors for comprehensive effects.
-  **Supports Fat Loss**
Helps increase fat metabolism and promote lean body composition.
-  **Cardiometabolic Support**
Supports heart health, blood pressure, and lipid balance.
-  **Sustained Results**
Designed for long-term metabolic improvement and wellness.
-  **Research Use Only**
Intended for laboratory research purposes only.

WHY IT'S SO POWERFUL

-  **MULTI-ACTION**
Targets multiple pathways for maximum impact.
-  **FAT BURNING SUPPORT**
Boosts metabolism and promotes fat utilization.
-  **BLOOD SUGAR BALANCE**
Supports healthy glucose levels and insulin function.
-  **LEAN MUSCLE PRESERVATION**
Helps maintain lean muscle while reducing fat.
-  **OVERALL WELLNESS**
Enhances energy, vitality, and overall well-being.

Suggested use based on peer-reviewed study protocols. Consult with your research mentor. Perfect to pair with: GLP-1 Protocols, metabolic studies, etc.

**LAB TESTED

TRANSFORMING RESEARCH. EMPOWERING RESULTS. ♥

RETA

DOSING GUIDE

1. WEEKLY DOSING

WEEK	DOSE
WEEK 1	0.5 mg
WEEK 2	1 mg
WEEK 3	1.5 mg
WEEK 4	2 mg
WEEKS 5–12	2–4 mg

- Once dose is above 2 mg, split into 2 shots per week (ex: Monday & Thursday)
- Run for 3–6 months and assess your results

2. MIXING GUIDE

PEPTIDE	BAC WATER
10 mg	1 mL
20 mg	2 mL
30 mg	3 mL

3. UNIT TO MG CONVERSION

UNITS	DOSE (MG)
5 units	0.5 mg
10 units	1 mg
20 units	2 mg
30 units	3 mg

4. EXAMPLE DOSE BREAKDOWN (AFTER WEEK 4)

WEEKLY DOSE	SPLIT INTO 2X / WEEK	EACH DOSE
2 mg	1 mg + 1 mg	10 units each
3 mg	1.5 mg + 1.5 mg	15 units each
4 mg	2 mg + 2 mg	20 units each

5. NOTES

- Keep it consistent
- Stay hydrated and eat clean
- Listen to your body and adjust as needed

BEAUTY • STRENGTH • CONFIDENCE

KLOW

NEW
ARRIVAL

ADVANCED PEPTIDE RESEARCH FORMULA

BEAUTY RESEARCH SUPPORT

Studies on potential aesthetic benefits in research subjects. KLOW is formulated to enable research into peptide-driven aesthetic optimization, including studies on skin regeneration, anti-aging pathways, and hair follicle revitalization.

SKIN REGENERATION SUPPORT

Explores pathways for dermal modeling and improved skin texture in subjects.

ANTI-AGING AND COLLAGEN

Facilitates study of fine line softening and long-term elasticity via collagen/elastin pathways.

HAIR AND SCALP STUDIES

Support investigations into follicle function, extension of growth phase, and improved density in subjects.

SKIN BARRIER ENHANCEMENT

Explores mechanisms for stronger barrier function and moisture retention in models, Research on hyperpigmentation.

KEY INGREDIENTS

- GHK-Cu (Copper Peptide): 50mg (62.5%)
- TB-500: 10mg (12.5%)
- BPC-157: 10mg (12.5%)
- KPV: 10mg (12.5%)
- TOTAL PEPTIDE CONTENT: 80mg

MUSCLE TISSUE REPAIR

Accelerates healing of muscle fibers and soft tissues.

JOINT & LIGAMENT SUPPORT

Strengthens connective tissues and improves mobility.

INFLAMMATION REDUCTION

Effectively calms systemic inflammation for faster relief.

BOOSTED IMMUNE FUNCTION

Enhances overall immune resilience and function.

WHY IT'S SO GREAT

MORE ENERGY

Supports research into cellular energy production pathways.

LEAN MUSCLE SUPPORT

Studies tissue repair and muscle maintenance mechanisms.

BETTER PUMPS

Research into vascular health and nutrient delivery.

FASTER RECOVERY

Explores tissue regeneration and repair in subjects.

OVERALL WELLNESS

Studies immune function and cellular health.

Suggested use based on peer-reviewed study protocols. Consult with your research mentor. Perfect to pair with: GLP-1 Protocols, advanced tissue studies, etc.

KLOW

DOSING GUIDE

1. DOSING OVERVIEW

PRODUCT	KLOW
VIAL CONTENTS	80 mg vial total (50 mg GHK-CU / 10 mg KPV / 10 mg BPC-157 / 10 mg TB-500)
BAC WATER	3 mL
DAILY DOSE	Once daily
SYRINGE UNITS	12 units
DAILY AMOUNTS	2 mg GHK-CU 400 mcg KPV 400 mcg BPC-157 400 mcg TB-500

- 12 units (0.36 mL) once per day
- Provides 2 mg of GHK-CU and 400 mcg of KPV, BPC-157, and TB-500 daily
- Take at the same time each day for best results

CYCLE TIME

2 MONTHS

- Do it every day for 2 months
- After 2 months, take a break if desired, then reassess and run another cycle if needed

2. MIXING GUIDE

VIAL SIZE	BAC WATER
80 mg vial (50 mg GHK-CU 10 mg KPV 10 mg BPC-157 10 mg TB-500)	3 mL

- Reconstitute 80 mg vial with 3 mL BAC water.

3. EXAMPLE DOSE BREAKDOWN

PRODUCT	BAC WATER	DAILY DOSE	SYRINGE UNITS	DAILY AMOUNTS
KLOW	3 mL	Once daily	12 units	2 mg GHK-CU 400 mcg KPV 400 mcg BPC-157 400 mcg TB-500

TESA + IPA BLEND

ADVANCED SYNERGISTIC RESEARCH FORMULA

PERFORMANCE & BODY COMPOSITION RESEARCH SUPPORT

Studies on potential athletic benefits in research supports. FLOW is formulated to enable instort into skin regeneration, aesthetic optimization, including and haw follielle pathways.

LEAN MUSCLE GROWTH RESEARCH

Explores pathways for hypertrophic response to restanuis.

FAT MASS REDUCTION STUDIES

Investigates synergistic effects on visceral adipose tissue.

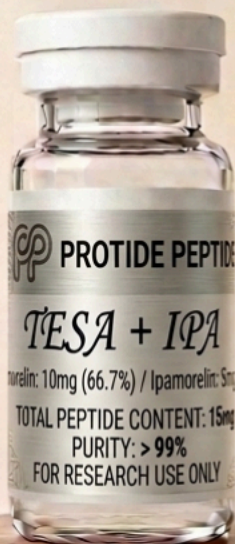

GROWTH HORMONE SIGNALING

Studies precise modulation and pulsatility in research models.

CELLULAR RECOVERY PATHWAYS

Explores tissue restoration mechanisms.

KEY INGREDIENTS

- Tesamorelin: 10mg (66.7%)
- Ipamorelin: 5mg (33.3%)
- **TOTAL PEPTIDE CONTENT: 15mg**
- **PURITY: > 99%**

MUSCLE TISSUE REPAIR

Accelerates healing of muscle fibers and soft tissues.

JOINT & LIGAMENT SUPPORT

Strengthens connective tissues and improves mobility.

INCREASED ENERGY EXPENDITURE

Researches potential for metabolic acceleration acceleration.

ENHANCED SLEEP ARCHITECTURE

Explores effects on slow-wave sleep in models.

WHY IT'S SO GREAT

MORE ENERGY

Supports research into cellular energy production pathways.

LEAN MUSCLE SUPPORT

Studies tissue repair and muscle maintenance mechanisms.

BETTER PUMPS

Research into vascular health and nutrient delivery.

FASTER RECOVERY

Explores tissue regeneration and repair in subjects.

OVERALL WELLNESS

Studies immune function and cellular health.

Suggested use based on peer-reviewed study protocols. Consult with your research mentor. Perfect to pair with: GLP-1 Protocols, advanced tissue studies, etc.

TESA/IPA

DOSING GUIDE

1. OVERVIEW

 VIAL CONTENTS	13 mg vial total (10 mg Tesamorelin / 3 mg Ipamorelin)
 BAC WATER	2 mL
 CYCLE LENGTH	Run this for 4 – 6 months Reassess after your cycle

2. DOSING PROTOCOL

 DOSE 20 UNITS DAILY Inject once per day	 TIMING FASTED 2 hours before and 2 hours after eating	 BEST TIME BEFORE BED Easiest and most convenient
---	--	---

20 UNITS GIVES YOU:
1 mg Tesamorelin | 300 mcg Ipamorelin

3. MIXING GUIDE

VIAL CONTENTS	BAC WATER
10 mg Tesamorelin 3 mg Ipamorelin	2 mL

- Reconstitute 13 mg vial with 2 mL of BAC water.
- Gently swirl – do not shake.
- Store mixed vial in the refrigerator.

4. UNIT BREAKDOWN

UNITS	TESAMORELIN	IPAMORELIN
10 units	0.5 mg	150 mcg
20 units	1.0 mg	300 mcg
30 units	1.5 mg	450 mcg
40 units	2.0 mg	600 mcg
